

Will Finland support energy investments in 2022 - 2026?

On 16 December 2021, the Government issued a decree that will allow support to energy investments under Finland's Recovery and Resilience Plan in 2022-2026. The aim is to promote energy investment and energy infrastructure projects that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target.

Is solar energy a viable alternative to self-consumption in Finland?

In Finland, solar electricity has so far been a financially competitive alternative only if the self-consumption rate has been high. Now, however, the situation is changing, as solar farms are being built to produce electricity to sell directly to the main grid. Globally speaking, solar energy generation is a massive business.

How much energy does a solar plant produce in Finland?

Supported by RENEWFM with EUR 9.9 million, the expected output of the plant is 67,6 GWh per year and will contribute to decrease approximately 3650 tons of CO₂ emissions annually in Finland. Poytya Solar: a 40,16 MWp Solar PV production site, located in Pöytyä, in the Southwest of Finland.

Does Finland have solar energy?

Contrary to popular belief, Finland's solar energy potential doesn't fall short of that of Central Europe. In the summer, the long days and nearly round-the-clock sunlight compensate for the dark winters. This article's Finnish version was first published in February 2019 and has been updated in June 2023.

Can Business Finland grant Energy Aid?

Business Finland may grant Energy Aid to projects with investment costs of at least EUR 10,000 (energy efficiency investments) or EUR 30,000 (other energy investments, such as renewable energy or utilizing waste heat as district heat). There is no upper limit for the size of the project.

Can solar power improve the profitability of buildings in Finland?

LUT University has investigated how the profitability of solar electricity could be improved in different types of buildings in Finland. Researchers have debunked myths related to the orientation and dimensioning of solar photovoltaic systems and sales of surplus electricity.

Eligible projects will be selected through competitive tendering managed by the European Climate, Environment and Infrastructure Executive Agency (CINEA). The call for proposals under the RENEWFM opened on 30 July 2024 and will close on 4 March 2025. The conditions that apply to the call for proposals include:
