

Florida solar energy center Estonia

What is the Florida Solar Energy Center?

The Florida Solar Energy Center (FSEC) was created by the Florida Legislature in 1975 to serve as the state's energy research institute. The main responsibilities of the center are to conduct research, test and certify solar systems and develop education programs.

What are Florida solar equipment standards?

The Laws of Florida (§377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center (FSEC). These standards cover both solar thermal equipment and solar electric equipment.

Does Florida require a solar system to be certified?

Find answers to frequently asked Testing & Certification questions. The Laws of Florida (§377.705, FS) require that all solar systems manufactured or sold in the state of Florida comply with Solar Equipment Standards promulgated by the Florida Solar Energy Center (FSEC).

What is Florida Energy Research & Development?

See how our research and development is leading the way. Our mission is to research and develop energy technologies that enhance Florida's and the nation's economy and environment and to educate the public, students and practitioners on the results of the research.

Why did the Florida Solar Energy Center revoke its ASP module registration?

On February 13, 2013, the Florida Solar Energy Center revoked its module registration of ASP modules, having discovered that documentation asserting Underwriters Laboratories (UL) testing was not substantiated by UL.
