

Forsee power Greece

Who is Forsee power?

A pioneer in the design and manufacture of high value-added battery systems, Forsee Power has positioned as a leader in its markets and benefits from a unique presence in Europe (France and Poland), Asia (China and India) and in North America (Ohio).

Where is Forsee power made?

Forsee Power, the French battery manufacturer, is building a new production facility and North American headquarters in Hilliard, Ohio, USA. The plant and headquarters are expected to reach a production capacity of 3 GWh by 2027.

What makes Forsee power unique?

Forsee Power's global offer covers the entire battery value chain: Benefiting from extensive experience in technological developments and their commercial applications in high-growth markets, Forsee Power holds many assets that increase its technological and commercial leadership:

Which vehicles are equipped with Forsee power batteries?

Light electric vehicles worldwide are equipped with Forsee Power batteries. Buses worldwide are equipped with Forsee Power batteries. Tonnes of CO₂ equivalent will be avoided over the lifetime of the heavy vehicles equipped by Forsee Power in 2022.

Why should you join Forsee power?

Forsee Power, with its 850 employees and experienced Board of Directors, is more committed than ever to pursuing its roadmap for sustainable and profitable growth. At Forsee Power, we are therefore cultivating the quality and diversity of our product range for electric trains. Our battery solutions operate on a 100% electric infrastructure or on a hybrid installation. In addition, we offer fast-charging batteries ...

Whether for heavy or light transport, Forsee Power solutions can be adapted to all projects aimed at electrifying your vehicles and reducing your carbon footprint. Our 160 engineers - in modelling, thermal management, mechanical design, ...

C'est parce que nous croyons dans les possibilités de cette technologie que Forsee Power est leader mondial des batteries pour véhicules lourds à hydrogène comme les bus et les camions. Nos solutions de batteries puissance H2 sont ainsi une proposition reconnue et une alternative performante aux véhicules 100% batteries.

Les véhicules électriques lourds, tels que les camions et les autobus, connaissent une révolution silencieuse mais significative grâce aux avancées dans les technologies des batteries. Les batteries offrent une source d'énergie propre et efficace pour ces véhicules, permettant ainsi de réduire les émissions de carbone et de promouvoir la durabilité.

Une structure de bilan solide bénéficiant d'une bonne position de trésorerie. Au cours du 1^{er} semestre 2023, Forsee Power poursuit l'optimisation des composants de son BFR (Besoin en Fonds de Roulement) avec un solde qui représente désormais 55% du chiffre d'affaires semestriel contre 62% un an plus tôt.. En parallèle, le montant des dépenses ...
