An installer is pushing fox but I'm a little unsure. I like the givenenergy and want all givenenergy so I don't have to keep switching apps for all the info. Also I want about 20-30kwh battery storage. Getting quotes today for givenenergy, fox and Tesla solutions.

I'm in the same place, Fox ESS v GivEnergy quote with jinko 435w panels. Installer raving about Fox has low start up power and higher power output from the battery. But, the GivEnergy battery is 9.5kw useable (100% discharge ok) but the Fox is 90% max, so the battery size gap might be bigger than you realise. Good Luck, I share your dilemma
