

Will France increase its solar power capacity by 2023?

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2022, the PV energy capacity in France amounted to approximately 17 gigawatts, making France the fifth European country for cumulative PV capacity that year.

How big is the solar market in France in 2023?

The French solar market grew by around 30% in 2023, reaching 3.15 GW, according to new data from Enedis. PV systems for self-consumption accounted for around one-third of all new capacity additions. From pv magazine France

How many solar panels did France install in 2023?

From pv magazine France France deployed around 921 MW of new PV systems in the fourth quarter of 2023, according to new figures released by French grid operator Enedis. For all of 2023, the country added 3,135 MW of new solar capacity. The results represent a 30% increase from 2022, when around 2.6 GW of solar was installed.

How big is residential solar PV in France?

The average size of residential solar PV systems is estimated to be 3.24 kW moving to 2030. The technical potential for residential solar PV in France is estimated at 34,810 MW. The payback time for residential Solar PV in France is 25.1 years as of 2015.

How much insolation does France have?

The insolation in France ranges from 3 sun hours/day in the north to 5 sun hours/day in the south. The output of a solar array is a function of age, temperature, tilt, shading, tracking, and insolation. France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023.

The French government says it plans to install 48.1 GW of solar by 2030 and 140 GW by 2050. About 45 GW of the mid-century total will be generated via installations on wasteland, while 35 GW will...
