

France sun storagetek 6100

What type of drive does the Sun StorageTek 6140 use?

The Sun StorageTek 6140 array supports both 4-gigabyte and 2-gigabyte Fibre Channel (FC) or Serial Advanced Technology Attachment (SATA) disk drives. Although you can mix drive types in the same tray, for optimal performance, Sun recommends that all disk drives in a tray must be of the same type.

What is the Sun StorageTek access volume?

The access volume, which is mapped to LUN 31, is listed only on the Mapping Summary page and is created on the Sun StorageTek 6140, Sun StorageTek 6540, and Sun StorageTek 2500 series arrays for communication between in-band management software and the storage array.

How do I access a Sun StorageTek array?

To access a Sun StorageTek array: Click Sun StorageTek Common Array Manager. In the navigation pane, expand the array you want to work with, and choose Pools. The Storage Pool Summary page is displayed. Click a pool name for detailed information on that pool.

How do I submit a review of Sun StorageTek array documentation?

Sun is interested in improving its documentation and welcomes your comments and suggestions. You can submit your comments by clicking the Feedback[+] link at: Sun StorageTek Array Administration Guide, Version 6.6.0, part number 821-0819-10. You specify the functionality you require, and the DVD installs the necessary software.

What Array Manager software does Sun StorageTek offer?

Software for the J4000, F5100, and B6000 array families is delivered on DVD and consists of the Sun StorageTek Common Array Manager software suite which provides management, monitoring, and service capabilities. The software has both a browser interface and a command-line interface (CLI).

What is Sun StorageTek SAN Foundation Software?

Sun StorageTek SAN Foundation Software is for managing the data path I/O connections between data hosts and the array. It includes drivers and utilities that enable Solaris data hosts to connect to, monitor, and transfer data in a storage area network (SAN).

This technical presentation describes the Sun StorageTek 6140 array, a new storage array that provides faster performance, greater flexibility and scalability, and robust data protection capabilities. It is available in ...

Worked at the StorageTek office in Ann Arbor, Michigan in the late 90"s. We had one or two of these huge tape libraries in our office, which was super cool. Sadly this was right in the era where Linux was really gaining steam in the Enterprise, so while StorageTek once supported dozens of different platforms, the company had whittled support ...
