

Gabon intends to increase its total installed electricity capacity by developing its renewable energy capacity. The government aims to increase the renewable energy share in its electricity mix up to 80% by 2030. The short-term target for the country is to increase the electricity generation capacity by 250 MW by the year 2023.

Solen SA Gabon, a subsidiary of Solen Renewable Dubai, has just launched the construction of the Ayémé Plaine photovoltaic solar power plant, a locality located some thirty kilometres from the capital Libreville. The future ...

The 8 solar power plants we will build will save one million litres of fuel oil per year, or 2600 tonnes of CO 2, and reduce production costs by 30% stalled near isolated villages, they will supply nearly 1600 homes. Their technology constitutes a major innovation for Gabon, which for the first time will be developing skills in photovoltaic solar power.
