UltraHorn™ TP antennas are highly directional scalar horn antennas. They offer all the benefits of scalar horns: ultra noise rejection, lossless connection of radio and symmetrical beam with no side lobes. These unique radiation properties make them excellent antennas for long links in environments with a high level of noise. Features Frequency Range - 5180 - 6400 MHz Gain - ...

We supply and install security and surveillance systems through partnering with globally renowned suppliers. We are committed to delivering real value and constantly work on dispensing innovative solutions to our clients.

The off-grid solar system is an electrical system that uses solar energy to provide the morning loads and in cases where solar is not sufficient uses either a generator backup or a battery backup will help run the loads.
