So Solar at this house would never be worth the cost, unless it was purely for green purposes. (That said, it may totally be worth it as an investment when I sell this house. Quite a few others in the neighborhood have gotten solar panels, eventually it'll affect my price negatively not to)

4 · Each year, solar panels get more and more efficient --that is, they produce more power per square foot. As of 2024, the most popular solar panels can produce about 400 watts of electricity when they're in full sunlight. If you want to make the most of your roof's solar potential, get panels with at least that much power output.

At Georgia Roof LLC, we don't just build outstanding roofs for a competitive price. Our customers choose us (out of the 10,000+ roofing contractors in North Georgia) because our values are simply - and obviously - a cut above the rest.
