

Gkinetic energy ltd Libya

Who are gkinetic energy?

GKinetic Energy Ltd are now progressing projects with a number of farms and landowners as our unique range of simple, small and safe Water turbines provide reliable, clean energy when it's needed most; through the night & through the winter. Our CTO Gary Brennan... What's in the water in Milwaukee?!

How does gkinetic work?

GKinetic are leading developers of innovative, patented turbines that work with nature to generate 100% clean, predictable energy from free-flowing water. We offer a clean, sustainable alternative to diesel generators and unlike competing hydrokinetic devices, our turbine works at average, lower flow speeds.

What is gkinetic technology?

GKinetic's technology is ideally suited to island applications. The device is floating and can be moored like a boat. Due to its innovative design, it does not require blocking flows or major civil works. It can be deployed in sites as shallow as 1.8m.

GKinetic Energy Ltd Renewable Energy Power Generation Clean, reliable energy generation from waterways: empowering communities and water-reliant industries. Follow View all 6 employees ...

Innovation in renewable energy system integration is vital for the long-term decarbonisation of energy. CASE continues to support projects such as this in marine renewables, along with others in energy systems and bio-energy. To date we have funded c.£2m of marine renewable energy research, in support of the Northern Ireland economy."

GKinetic innovative, flow accelerating hydrokinetic turbine. GKinetic Energy Ltd is an Irish-based company developing innovative hydrokinetic turbines producing clean energy from canals, rivers and tidal flows. Its unique, patented technology relies at its core on placing an intentional obstacle, like a buoy, between two turbines allowing them ...

GKinetic Energy Ltd. was founded in 2014 and is based in Newcastle West, County Limerick in Ireland. GKinetic is developing a range of innovative hydrokinetic turbines for both river and tidal flows. From the start, one of the main drivers has been the huge market opportunity to harness this reliable and predictable renewable energy resource.
