

Can Ukraine become a green energy superpower?

New research from Razom We Stand has found that replacing all of Ukraine's coal-powered plants with renewable energy would cost around \$17 billion (EUR15.7 billion) - an achievable amount, according to the director. This commitment to become a green energy superpower... excites me the most because it means we eliminate poverty.

Will Ukraine be a 'green energy hub' for Europe?

But Ukraine's power system perseveres. Yesterday (23 February), the ministry reported that it sent surplus electricity to Poland, as a result of excess power generated by solar plants. President Volodymyr Zelenskyy has said that he wants Ukraine to be a "green energy hub" for Europe.

What happened to Ukraine's energy infrastructure?

Around 50 per cent of Ukraine's energy infrastructure has been affected, damaged or destroyed by Russian forces. Zaporizhzhia nuclear power plant - Europe's biggest which used to supply a fifth of Ukraine's electricity - was captured early on. The Kakhovka Dam with its huge hydropower plant was destroyed last summer.

Will Ukraine rebuild stronger & greener on the second anniversary of Russia's invasion?

On the second anniversary of Russia's invasion, Ukraine is determined to rebuild stronger and greener - here's how. Shortly after midnight on 24 February 2022, Ukraine disconnected itself from Russia's power system. Four hours later, Russia launched a full-scale invasion which continues to inflict untold suffering on the second anniversary.
