By 2020 Estonia - the most digitally advanced society in the world - still lacked a proper purpose-built large-scale data center. To be more precise the Eastern and Central Europe as a whole lacked sustainable and reliable data centers. To the founders of Greenergy Data Centers (GDC), this fact was unacceptable.

The acquisition of Greenergy presents a unique opportunity for Trafigura to strengthen its fuel supply operations in Europe and to add the physical production and distribution of renewable fuels to its growing biofuels business. Post acquisition, the company will continue to be led by its current management team.
