The lifespan of a grid-tied inverter largely depends on its quality, installation, usage, and maintenance. Nonetheless, on average, a well-maintained grid-tied inverter can last ...

If your system is at capacity, or getting too many shades, another option is to get panels with a micro grid tie inverter for each of them, that you could just connect to your off-grid AC circuitry. That way shades on one panel does not reduce down your whole system production, you don't have to invest on thicker wire for panels.

1. Connecting a grid-tie inverter to a grid-fed wall socket is generally not by code. To say that people do it anyways, wouldn't be far from the truth. As for feeding excess production to the grid - you would have to check with your local rules and regulations.

We stock a wide range of grid-tied solar power inverters to complete your PV project. View our competitive prices online or contact Sustainable about your inverter requirements today.
