

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33 USD/kWh.

Does Guadeloupe rely on imported fuels?

Nevertheless, Guadeloupe's reliance on imported fossil fuels--more than half of the island's electricity is generated from imported petroleum-based fuels--leaves it vulnerable to significant disruptions in shipping or the availability of import facilities.

Is Guadeloupe a renewable country?

Guadeloupe has a large portfolio of renewable generating capacity, with 112.8 MW installed as of 2013. It also has a diverse portfolio, both in terms of generation types and facility ownership.

This is the first wind plant with storage in France. The presence of a storage component allows the system to compensate for the fluctuant nature of wind power production hence delivering power that is aligned to the electricity consumption of the island.

Guadeloupe has several sites for hydropower development. The existing installations are mainly located in Basse-Terre, due to the combination of water conditions and suitable topography. ...

In the frame of the 2011 call for proposal "Energy storage" launched by the ADEME (French Environment and Energy Management Agency, EDF aims to propose a 50 ...

This document was developed by the National Renewable Energy Laboratory with support provided by the Caribbean Center for Renewable Energy and Energy Efficiency and the Regional Council of Guadeloupe.

Guadeloupe has several sites for hydropower development. The existing installations are mainly located in Basse-Terre, due to the combination of water conditions and suitable topography. The only installations on Grande-Terre are Letaye and Gaschet.

In the frame of the 2011 call for proposal "Energy storage" launched by the ADEME (French Environment and Energy Management Agency, EDF aims to propose a 50 MW seawater pumped storage project for the island

of Guadeloupe.

French renewable energy producer Albioma Sa (EPA:ABIO) commissioned in late June the 3.3-MWp Sainte-Rose solar photovoltaic (PV) farm with energy storage in the ...

French renewable energy producer Albioma Sa (EPA:ABIO) commissioned in late June the 3.3-MWp Sainte-Rose solar photovoltaic (PV) farm with energy storage in the French overseas department of Guadeloupe, the company said Monday.

This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe has set a target to achieve 100% energy independence by 2030.

The project is a part of France's Energy Regulatory Commissions (CRE) tender to develop 11 large-scale storage projects with combined power of 50 MW and a storage ...

energy storage systems (for customers who own PV systems). The newly installed assets will be controlled by EDF but aim to create energy savings for customers while at the same time

This is the first wind plant with storage in France. The presence of a storage component allows the system to compensate for the fluctuant nature of wind power production hence delivering ...

Wind farms built in Guadeloupe (EDF SEI, producer data, 2018) Since 2006, three wind farms have been built for an additional 6 MW of power at the La Mahaudière and Grand Maison sites, and on the island of La Désirade during the upgrading of the Souffleur site.

On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the ...

Wind farms built in Guadeloupe (EDF SEI, producer data, 2018) Since 2006, three wind farms have been built for an additional 6 MW of power at the La Mahaudière and Grand Maison ...

The project is a part of France's Energy Regulatory Commissions (CRE) tender to develop 11 large-scale storage projects with combined power of 50 MW and a storage capacity of 56.8 MWh. In Guadeloupe, CRE has selected EDF SEI for 5 MW/4 MWh project.
