1. Y&H 1000W Stackable Grid Tie Inverter with Power Limiter The Y&H 1000W Grid Tie Inverter converts DC power generated by solar panels into AC power, connecting seamlessly to the grid and supplying the available panel power to the AC load.

Are grid tie inverters worth it?

Grid tie inverters are a great cost-saving addition to your home solar system, but they don't often come cheap. If budget is your primary concern, then you'll be glad to know there is a trustworthy brand out there with a grid tie inverter just for you. Y&H have produced this micro-inverter to cover conversion of DC power up to 350 watts.

What is a grid tied inverter?

Grid-tied inverters serve the purpose of converting Direct Current (DC) generated by solar panels into Alternating Current (AC). The power converter to AC is transferred to the utility grid and then from there to the appliances. Excess electricity generated and unused during the day is fed into the grid and the owner receives credit for it.
