

Guyana's energy demand is growing and more solar power projects are coming on stream in coastal and hinterland areas to meet that demand, according to the Chief Executive Officer of the Guyana Energy Agency (GEA), Dr. Mahender Sharma. Peak demand for electricity in Guyana stands at about 153 megawatts (MW) currently. In coming years, however, [...]

Solar power battery systems are an important component of any home solar system. Having a good quality and reliable battery means you can get the most out of your solar system and can save even more money and energy. There are some important questions a lot of people have about battery systems though. What should you look for in a battery?

2 - In most cases, your battery backup isn't going to power the entire house. So you need to determine if you want a critical loads panel, or some other solution to limit which circuits will get backup power, and which will not. Your inverter can only produce so much power from solar and batteries, so choose wisely.

The Onderneeming site will contribute 5 MWp of solar capacity, backed by 7.5 MWp of battery storage, while the Charity site will provide 3 MWp of solar power with 4.5 MWp of battery storage. These projects are part of the Guyana Utility-Scale Photovoltaic Programme (GUYSOL), a government-led initiative designed to diversify the nation's ...
