

Who is Hexatron technology?

Hexatron Technology is an innovative & dynamic organization that keeps exploring, developing and commercializing sustainable, innovative, cost-effective, practical clean energy solutions and technologies.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How much PV power can be produced in Palestine?

In Palestine, the average values of specific PV power production from a reference system, described in Table 2, vary between 1700 and 1765 kWh/kWp for the selected three areas. A maximum value of energy that can be produced in Gaza and in the very southern region of the West Bank is higher than 1800 kWh/kWp.

What is the energy problem in Palestine?

The energy problem in Palestine is one of many issues that affect the social and economic conditions of the Palestinian people. The fact that most of the energy is imported at relatively high prices places more financial burdens on poor and marginalized people.

Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

How much do Palestinians spend on energy?

On average, households spend nearly 34 percent of their income on food and around 8.5 percent on energy (electricity and liquid gas). This reflects the vulnerability of Palestinians, especially the poor and marginal segments, and limits their ability to obtain the energy they need for daily use.

Ganesh Green Bharat Ltd has secured a contract worth Rs. 8,99,13,600 for supplying monocrystalline modules to locations in Tandaliya and Lathidad, Gujarat Solar Park from Hexatron Industries Ltd. Hexatron solar Palestine

Hexatron is a vague sci-fi aesthetic that was prominent throughout the 2010s following the end of the Frutiger Era, and is characterized by hexagons, neon blue, holograms, and futuristic technology. It maintains some Frutiger Aero motifs such as futurism, gloss, and 3D graphics, but contrasts it by largely omitting the nature-centered values of Frutiger Aero, incorporating sharp ...
