

Himawari sun French Guiana

How does the Himawari solar lighting system work?

The Himawari solar lighting system works by directly collecting sunlight using a sunlight collector (lens focusing unit) and quartz glass optical fiber devices. It also features an automatic tracking system and is covered by an outer acrylic dome. The natural light from the sunlight is harnessed instead of using electronic energy like regular LED lights.

Does Himawari capture sunlight?

Therefore whenever where you are, Himawari can always capture sunlight for you. Note: 12 lens Himawari only needs 2W power consumption to provide power for the movement of Himawari when it keeps tracking and following the direction of the sun.
