

How do I expand my home assistant storage?

When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

How to save home assistant backups on Nas?

To be able to save our Home Assistant backups on our NAS, we must first mount the corresponding directory in our Home Assistant. This can be done under "Settings" -> "System" -> "Storage" -> "Add Network Storage" Fill out the form and click on Connect. To have the backup created automatically, we create an automation.

Where should a home assistant backup be located?

Of course, the backup location must be placed on the NAS mount that has just been created. A very popular method for Home Assistant backups is the Google Drive Backup plugin. This add-on automatically synchronizes your Home Assistant backups with your Google Drive account. It offers a simple and reliable solution for backing up your data off-site.

What backup options are available for home assistant?

Regular backups are crucial to protect your configuration, automations and integrations from data loss. This article introduces various backup options for Home Assistant, including the use of network-attached storage (NAS), the Google Drive backup plugin and virtual machine (VM) backup when Home Assistant is virtualized as a VM.

Should I store backups outside of home assistant?

Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with. It also makes sure you can restore Home Assistant from backup in case you have an issue with your current installation.

How do I restore home assistant to a new SD card?

Use a backup to restore Home Assistant from backup on the new SD card. If you are running Home Assistant as a VM, look at the documentation for your hypervisor on how to expand disks for virtual machines. Home Assistant will auto-expand to use the newly added space.

I went through a guide to install and configure my Home assistant on a Virtual machine on my Synology NAS, and all is working perfectly, but I wanted to have a look and ...

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server.

Home assistant storage Indonesia

Available for free at home-assistant.io.

Home Assistant 2023.6: Network storage, favorite light colors, new integrations dashboard Add and use network storage, the integrations dashboard got a revamp, add your favorite colors to your lights, copy & paste support for automations, blazing speed through Python 3.11, and ...

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. ...

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I hit "reload" the message disappears. Anyone experienced something similar?

Home Assistant keeps your data local, no need for a cloud. Home Assistant communicates with your devices locally, and will fallback to pulling in data from the cloud if there is no other option. No data is stored in the cloud, and ...

Home Assistant OS. addon. drummer3333 September 21, 2022, 12:01am 1. Im currently packageing mbentley/omada-controller as hassio-addon. But I can't find how other addons (like MariaDB) manage to store the data persintently. ... You can look at the hackjobs I did for some addons to get persistent storage: GitHub - jdeath/homeassistant-addons.

I've defined a new network storage for backup using Samba to my NAS. How can I check if it's working? So from now on all the backup will be stored on network storage instead of local backup folder? Will this work with ...

This article introduces various backup options for Home Assistant, including the use of network-attached storage (NAS), the Google Drive backup plugin and virtual machine (VM) backup when Home Assistant is ...

Really like using the trace functions to debug why things don't work properly but the time they persist just doesn't make it practical to use unless you are in front of the PC when the automation executes. I'd like to be able to make the traces persist longer, even half hour would be great. At the moment I have a misbehaving automation that only runs when I arrive ...

Best Working SSD / Storage Adapters for Raspberry Pi 4 / 400 With the new media playback and browser, what is the recommended SSD size I should buy? Home Assistant Community Recommend SSD size for HA. Hardware. yousaf465 (Yousaf465) March 11, 2022, 11:02am 1. what is the recommended SSD size for the HA these days, I am running HA on ...

Hello. I'm about to purchase an Odroid N2+ with eMMC module to run Home Assistant OS, but I'm

Home assistant storage Indonesia

wondering what size I should go for. Could someone please advise how much disk space would be required to run HAOS? As a complement of information, I've got a separate NAS with my multimedia files on it and plenty of spare space. I could eventually have ...

Would like to maybe see an easier option to select "storage" options for the HAOS system and/or it's add-ons. I have been using HAOS since starting with it in late July 2024 when I learned about Frigate NVR. It has been a learning experience using YAML and configuring it all to make it work on my Pi3 B v1.2. Early August I upgraded by purchasing Pi5 8GB, Pi ...

Intro SD cards, but also SSD's to a lesser extent, have a finite number of write cycles and will fail at some point. Your mileage will vary based on the quality of storage you're using, and of course how busy your system is. But one thing can be said and that is that Home Assistant does very little to help and reduce the data being written to disk. In Release 2022.4 some improvements ...

The aim of this thesis is to compare different storage options in Home Assistant (HA). HA is an open source project for home automation, prioritizing local control and privacy.

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I ...

Hi there, I went through a guide to install and configure my Home assistant on a Virtual machine on my Synology NAS, and all is working perfectly, but I wanted to have a look and understand if my resources (CPU, storage, etc ...) were still ok, and I have some questions / unclarities ... First, on my Synology Virtual machine, I see this ...

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. Following this the .storage folder was visible in my file editor under config/ and I was able to access the files.

Hi, I have installed HA with Home Assistant Operating System approach on pi4, 128GB SD card. My recorder is set at 10 days. I configured some backup and store only one copy on local and the rest to Google drive. Recently I got warning about usable space is low (<10GB), I have no idea what eat up my space the most. I checked my log and only a few MB used. Is ...

Hi! I have some camera's in my house that I want to use in a better way. Right now the camera's takes pictures on certain triggers. The aim is now to record and save the video file to a local place. For example when my ...

Can someone give me detailed instructions on accessing the hidden files in ".storage" ? I just got a brand new HA Blue and in the process of getting it going I somehow have the wrong username and password.

Instructions under Authentication - Home Assistant mention deleting some files from .storage but nobody gives details on how to do it. Unfortunately SSH ...

As I understand it, once a HassOS image (either for an RPi or for a VM) is initialized, it cannot expand the size of the partition it uses. This is a problem if one needs to add storage - easy enough to move the image to a larger SD card or allocate more space to the VM, but neither does anything if HassOS doesn't expand its internal partitions. I know for VMs ...

Hi everyone! I've just installed HA on a mini pc with in a primary SSD and a slave HDD. In order to do not use the SSD as the disk to store the historical data, logs, etc... I'd like to move them into the HDD. I know, it has less performance than the SSD but, you know, SSD are not really designed for high updated data changing continuously. Is there any way to do that ? it ...

Hi All, For those who want to know HDD temp (+ all HDD S.M.A.R.T data attributes) and are using HASS.IO I've created simple addon that monitors disk temp using smartctl. Addons schedules CRON and provide data in HA via ...

Hi! I have some camera's in my house that I want to use in a better way. Right now the camera's takes pictures on certain triggers. The aim is now to record and save the video file to a local place. For example when my home alarm is trigged a want my camera's to record... Please guide me to the best solution.

Xiaomi Home Integration implements OAuth 2.0 login process, which does not keep your account password in the Home Assistant application. However, due to the limitation ...

I'm running HAOS on an RPi 4. Recently, the 32 GB SD card (this post isn't about if you like HA running on an SD card) filled up and corrupted my database (no big deal), so a new database was started. This set me on a ...

If you know of a way to do this today in the current product please share. I'm not aware of one but I'd be happy to be wrong. There might be several ways, from writing/modifying parser in order to accept non-tree-structured yaml elements as language tokens up to storing yaml "as is" and parse it at the moment of execution.

Hi All, I am running an Ampere.Storage PRO Inverter, which is definitely a SAJ HS2 Series with some minor changes. After long research I found the Modbus Datamodel and implemented it in telegraf which streams the data into InfluxDB. To visualize the data, I am currently using a Grafana dashboard. In general, it works pretty good so far. There are a few ...

tl;dr - Running `du -shc /* | sort -h` from the SSH add-on will show most everything except add-ons. To see add-on sizes, run `docker ps --size` from console or SSH access into HAOS (not the add-on).. Running this from the SSH add-on will only show you the storage seen by the HA container (I'm probably wording some of

this technically incorrectly).

Hi, it seems that my storage is almost full. I did had some messages in my Unifi controller (running as add-on on hassio) and a system metric shows that 97.7% is now full of disk: What can I do to check and free up disk space again? ... Home Assistant Community Disk almost full. Installation. Home Assistant OS. WTFoX74 (Martin) June 10, 2019, 2 ...

To the Addon: Hassio-Addons/rsync at master · Poeschl/Hassio-Addons · GitHub And for local storage devices: Sync folders to a external usb drive connected to the supervisor host with rsync. ... So why not have all important Syncing data and its status in Home Assistant, and even let it talk to me/alert me when things happen? I use TTS ...
