The libbi home battery storage system and inverter can be installed both indoors and outdoors, however the libbi controller must be installed indoors. When installing indoors, there needs to be sufficient space around the system to allow for air flow, and it can't usually be installed in loft spaces (due to the weight) or blocking an entry or ...

This all depends on how well you use your system and the cost of electricity. The typical property has had the unit cost of electricity capped at around £0.35/kWh and off-peak electricity can be purchased at £0.075/kWh. If a home battery system could store 2500 kWh of Solar PV power and 4000 kWh of off-peak electricity the annual saving could be over £1,800 per annum.
