

Honduras radiance energy

What is Honduras' energy mix?

In 2021, Honduras' energy mix was led by oil, constituting 52.3% of the total energy supply, followed by biofuels and waste at 33.7%. Modern renewables, which exclude traditional biomass practices like burning wood or agricultural residues, accounted for 13.7%, while coal made up just 0.3%.

What type of energy is used in Honduras?

Solar photovoltaic (PV) energy followed at 18.9%, with wind power at 12.9%, and geothermal energy at 5.8%. Due to the diversity of the Honduran landscape, the potential for wind development varies considerably. A 100 MW wind project was built in 2012.

Can Honduras generate electricity from biomass?

Honduras has a large potential for electricity generation from biomass, mainly from the sugar industry. Currently, there are nine biomass projects in operation, with a total of 81.75 MW installed capacity. These plants are estimated to supply 2.3 percent of the total demand of energy in Honduras for 2007.

Does Honduras need a new infrastructure?

However, national renewable energy and sustainable development ambitions in Honduras face important infrastructure constraints. For example, significant investment is needed to enhance the quality of energy and water services, including improvements in coverage and connectivity.

Does Honduras have solar power?

Honduras has a large potential for solar photovoltaic generation. In fact, it is a practical solution for servicing energy-isolated rural communities. In 2007, there were about 5,000 individual Solar Home Systems, with an average size between 30 Wp and 50 Wp, which makes up for a total capacity of approximately 15 to 25 kW of power.

Will Halcyon build a hydrogen pipeline in Honduras?

With an abundance of solar radiance in the Sula Valley of Honduras, coupled with the availability of freshwater feedstock from the Ulua River, Halcyon plans to construct multiple towers producing volumes of hydrogen that can be transported by pipeline through Guatemala and Mexico into the United States. Why Hydrogen?

With an abundance of solar radiance in the Sula Valley of Honduras, coupled with the availability of freshwater feedstock from the Ulua River, Halcyon plans to construct multiple towers producing volumes of hydrogen that can be ...
