

Household power station Seychelles

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

Does Seychelles have electricity?

Seychelles is among four countries in the African continent with 100% access to electricity, of which over 90% of the energy is generated from fossil fuels. The energy transition is a crucial enabler of sustainable development and climate resilience.

Why is the PUC planning a power transition in Seychelles?

For the next four to five years, the PUC has carefully scheduled this transition in order to guarantee a stable energy supply that can sufficiently sustain the nation's economy. Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

How does UNDP support the Seychelles Energy Commission?

Through the Climate Investment Platform, UNDP is supporting the Seychelles Energy Commission's initiative to make the adoption of renewable energy accessible to the population that would otherwise not be able to afford to do so.

Why do Seychelles have high power costs?

Like many other small island developing states (SIDS), Seychelles faces extremely high and fluctuating power costs resulting from dependency on mineral oil products for power generation and fuel for transportation.

What is the project from Seychelles?

The project from Seychelles is one of ten projects selected by the Climate Investment Platform. This summary is generated by Google AI, and its accuracy and relevance may vary. Please consult the detailed list of results for greater precision.

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the ...

Renewable energy in Seychelles is a recent development in providing power to the country. Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). [1] Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

Household power station Seychelles
