

Why is solar power growing in Hungary?

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2022 Hungary had just over 4,000 megawatt (MW) of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010.

How big is solar power in Hungary?

Solar momentum is building in Hungary with almost 4 GW of generation capacity, more than 2.5 GW of which is from arrays bigger than 50 kW in scale, according to data published in December by the Hungarian Energetic and Public Utilities Regulatory Authority. Attila Keresztes, CEO of Astrasun Solar.

What is Hungary's largest solar energy project?

Hungary's largest solar energy project is underway, in collaboration with Huawei. The contract was signed in February, with MAVIR Ltd. as the investor.

How much solar power will Hungary have by 2030?

According to the timetable set by the new National Energy Strategy adopted in January, at least 6,000 MW of solar capacity must be operating in Hungary by 2030, which can only be accomplished if large-scale project development starts in the country as soon as possible. Are you considering entering other markets?

What is Hungary's largest energy storage facility?

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was signed in February, with MAVIR Ltd. as the investor. According to portfolio.hu, the project is estimated to cost HUF 8.5 billion (EUR 21 million), with a capacity of 60 MWh.

How much does energy storage cost in Hungary?

According to portfolio.hu, the project is estimated to cost HUF 8.5 billion (EUR 21 million), with a capacity of 60 MWh. Currently, Hungary's entire energy storage capacity stands at 30 MW.
