

Will hynfra participate in a Bess auction?

For the upcoming one in December, 16GW of BESS got preliminary registration to the capacity market, the first step to participating in the auction, he added, of which 580MW is Hynfra's, through its Hynfra Energy Storage arm.

Will hynfra make it to Poland?

"Not all will make it," Umeda said, but Hynfra is "doing all it can" to put its 580MW in, and plans to submit 2GW for next year's. The Polish market is starting from a low base but looks set to pick up as renewable deployments increase and with it, opportunities for energy storage.

Will hynfra's Bess project be delivered in 2027?

As reported here at the time, the company had a 7.5MW BESS project win an award in last year's auction in December which handed out a total of 5,379MW of contracts. There are five years between capacity market award and delivery so Hynfra's project is deliverable in 2027.
