DV Power | 4,389 followers on LinkedIn. Smart test devices for reliable electric power systems | IBEKO Power AB, with headquarters in Stockholm (Sweden) and best known through the brand "DV Power", has since 2000 developed radically light and ingenious test solutions for transformers, circuit breakers, and batteries. The company was founded by a group of ...

IBEKO Power AB Main site: Stockholmsvägen 18, 2nd floor, SE-181 50 Lidingö, Sweden has been registered by Intertek as conforming to the requirements of ISO 9001:2015 The management system is applicable to: Development, control of manufacturing, marketing, sales, after-sales support

voltage is recommended. When you test power transformers, you can select any test voltage. You do not have to test power transformers with 100 V to have better accuracy of results. TRT devices have the same accuracy using 100 /80 V or 40 V or 10/8 V AC. The best accuracy is provided by TRT63 series . 2010 IBEKO Power AB, Sweden.

I am a highly motivated and skilled professional with strong social and deductive skills. Throughout my career, I have led multiple teams, demonstrating high potential for delivery. I have successfully completed over 30 projects, with special emphasis on:

- Changes to the card processing center
- Implementation of agile development methods
- ...

Although placed in a very portable and lightweight metal housing, RMO-A micro-ohmmeters have very high output power capabilities. They can generate 600 A test current continuously for up to 20 s. You can test with current up to 100 A without a rest time.

DV Power qualified engineers will gladly assist you during measurements or answer your technical questions from different areas of the electrical power market. SERVICE We provide 3 years of warranty for our instruments and 10 years of spare parts availability.
