

Does Sierra Leone have a solar energy resource?

Ministry of Finance The Government of Sierra Leone (GoSL) recognises that the country is endowed with a significant solar energy resource. This potential however remains largely untapped.

Will a new power plant increase electricity supply in Sierra Leone?

Overall, the facility is expected to raise the operational electricity supply in Sierra Leone by about 30%. According to the statement, only 23% of the population of the country currently has access to electricity.

What will GOSL do for Sierra Leone?

GOSL will remove barriers hampering the effective development, implementation and dissemination of renewable energy technologies. Also, the draft Energy Policy estimates that Solar PV generation capacity in Sierra Leone is expected to start at 31 MW in 2020 and increase to 156 MW by 2023.

What is the National Development Strategy of Sierra Leone?

This is one of the key documents on the overall national development strategy of Sierra Leone, including, among other areas - the energy and solar generation sector. It is a recent document, indicating the actual strategic direction of the Government with clear targets and policy actions.

Who regulates the energy sector in Sierra Leone?

The primary law regulating energy sector in Sierra Leone is the National Electricity Act 2011 ("Electricity Act"). This Act incorporates EGTC and establishes EDSA, both of which started operations in 2015. It also sets the legal provisions under which those entities are governed, managed, functioning and are funded.

Do Sierra Leone laws apply to a project financed infrastructure project?

In most cases the Government insists on applying Sierra Leone laws exclusively to the entire IPP project, but because Sierra Leone's laws are not sufficiently developed to deal with the complexities of project financed infrastructure contracts Sierra Leone, investors and especially lenders, insist that the laws of other jurisdictions be applied.

This is on top of Iberdrola's new plan to invest EUR15.5 billion (US\$17.2 billion) in renewables by 2026 and commission 6GW of solar PV and onshore wind by 2027.
