

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

Is energy du Mali subsidized?

Energie du Mali (EDM), the state-owned electric utility, is poorly managed and heavily subsidized by the government and regional multinational banks, as the relatively high price of its electricity (average \$0.17/kWh) is insufficient to cover the cost of production and distribution (\$0.24/kWh).

How is energy used in Mali?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How many people in Mali have access to electricity?

In Mali, less than half of the population has access to electricity, whereas in rural areas access is limited to only 16.7% of the population. In terms of modern fuels, access is extremely low, at only 2% and 3% for rural and urban areas, respectively. Energy access is widely recognised as essential to improve economic welfare.

What are the main sources of electricity in Mali?

At present, thermal and large-scale hydropower plants are the main sources of electricity supply on the national grid. Renewable energy could provide the most competitive form of power in Mali due to today's advanced technological reliability, declining technology costs and high resource potential.

What is the power access rate in Mali?

The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015). Power generation is limited (Annex A.17), forcing Energie du Mali (EDM, the power utility) to have recourse to frequent load shedding.

Through strategic coordination and with the benefit of the SREP experience, Mali, led by its ministry of energy and water, prepared its CIF-REI Investment Plan, which was ...
