

Is India a global power?

The rise of India as a global power is a significant development in the 21st century. This transformation is rooted in its rich history, diverse culture, and strategic geopolitical position. Understanding India's journey to becoming a global power is crucial for students preparing for competitive exams.

Is India the next great economic power?

Not just enthusiasts within the country, but a chorus of global analysts have declared India as the next great economic power: Goldman Sachs has predicted it will become the world's second-largest economy by 2075, and the FT's Martin Wolf suggests that by 2050, its purchasing power will be 30% larger than that of the U.S.

Is India a superpower?

India's manufacturing prowess is also unlikely ever to match that of China: the share of its industrial sector in GDP is not only far smaller than China's, but is already in decline. Yet size matters: with its huge population and a big economy, India would be a superpower, not fully matching China or the US, but unquestionably a great power.

Is India a rising global power?

Within this shifting global landscape, India has the opportunity to put in place a new framework for its own security, growth and development, and that of developing countries around the world. As a rising global power, this must be India's principle endeavor in the coming decades. The changing international order

Is India a significant economic and geopolitical power in 2023?

Amidst a challenging global scenario, India has emerged as a significant economic and geopolitical power. 2023 was a landmark year for India as it assumed the presidency of the G20, marked by some notable achievements. India is poised to play a defining role in shaping the future of the global economy in 2024 and beyond.

What does India need to be a leading power?

As a leading power, India must look beyond raw indexes of economic, political and military might, and craft a consensus that is consistent with its ancient and historic view of the world. Have you read? Where will future economic growth come from?

India is playing a more active role in global politics and the economy. Perception about India has changed, but the big question remains: is India on the road to a major power tag? This article aims to discuss this question and search for possible answers, on the eve of the 74th Independence Day.
