What is the pulse production in India?

With reference to pulse production in India, green gram alone accounts for nearly half of the production. Consider the following statements: 1. Black gram can be cultivated as both kharif and rabi crop. 2. Green gram is a significant contributor to pulse production in India, accounting for nearly half of the total. 3. In the last three decades, while the production of kharif pulses has increased, the production of rabi pulses has decreased.

Why are pulses important in India?

Pulses assume special significance in the cropping systems and daily diets in India. Traditionally pulses are used for human consumption as dehusked seed splits after minimal processing. They are also the important ingredient of popular Indian snacks.
