

Can hydrogen be used in Italy's energy system?

Snam with the analytical support of McKinsey has conducted a study on the potential role of hydrogen in the Italian energy system, which shows that Italy is particularly well-suited thanks to its excellent natural resources to generate renewable power, and its existing gas infrastructure network - including the connections to North Africa.

What is the first green hydrogen plant in Italy?

2 Luglio 2023 The first green hydrogen Italian system H2 Energy has successfully established the first industrial-scale green hydrogen plant in Italy, boasting a modular and easily maintainable design.

Will Italy start a low-carbon hydrogen economy?

“The Ministry of Economic Development forecasts that up to EUR10bn of investments will be required between 2020 and 2030 in order to launch a low-carbon hydrogen economy in Italy.” It has been estimated that hydrogen could constitute almost a quarter of Italy's overall energy demand by 2050.

Could Italy import hydrogen from North Africa?

Italy could import hydrogen from North Africa, at cost 14% below domestic production. Italy could employ its existing pipelines to Northern Africa to put solar panels “where the sun shines” more, produce hydrogen locally, and then transport the hydrogen to Italy through the pipes. This could also provide hydrogen exports through Italy into Europe.

Why is Italy a hub for hydrogen trade?

Italy's central location in the Mediterranean makes it ideally situated to become a hub for the hydrogen trade. In April 2019, Snam was the first company in Europe to experiment with injecting a mix of 5% hydrogen by volume and natural gas into its transmission network.

Will Italy be able to develop green hydrogen by 2050?

It has been estimated that hydrogen could constitute almost a quarter of Italy's overall energy demand by 2050. Despite this great potential, Italy still faces some major obstacles, including regulatory concerns that could hinder the full development of green hydrogen. This includes the absence of specific:

Bereits im Frühjahr 2023 wurde HGM Energy in Ambrian Energy umfirmiert. Im Zuge der Neuausrichtung wird das Unternehmen den Fokus noch stärker auf den Handel mit flüssigen Biokraftstoffen sowie synthetischen Kraftstoffen legen, um die Entwicklung des Geschäfts weiter erfolgreich voranzutreiben.
