

Italy power back up for house

Where can I get electricity in Italy?

ENEL is the Italian national power company but there are some others you can choose among. In order to set up a contract for the supply of electricity in Italy you need to contact the provider and will require proof of identity, your tax number, bank details and details of your property.

How many kilowatts is enough for a home in Italy?

For most Italian homes, 3KW is sufficient, however if you feel that 3KW is not sufficient you may request an upgrade of the power from your electricity supplier (If a household expects to run a number of appliances simultaneously and exceed the power available a larger supply (up to 6 kilowatts) can be requested).

Can I buy a power adapter in Italy?

Adapters can be bought for appliances with foreign plugs. The basic electricity contract in Italy is set up to provide approximately 3 to 3.2 kilowatts. If a household expects to run a number of appliances simultaneously and exceed the power available a larger supply (up to 6 kilowatts) can be requested.

How do I set up a contract for electricity in Italy?

In order to set up a contract for the supply of electricity in Italy you need to contact the provider and will require proof of identity, your tax number, bank details and details of your property. It may be simpler to ask the current owner not to cancel their contract and instead to transfer them into your name.

How to use a power socket in Italy?

Not every Italian power socket has three holes so it's better to be safe with a two-pronged adapter. Sometimes, these will have an area to plug something in and also have a USB port, meaning you can charge your phone and laptop at the same time! To use one, you should make sure your device is insulated, for example by plastic.

Can you bring electronics on a Italian holiday?

If you plan on bringing any electronics with you on your Italian holiday, then this is the article for you. Devices like laptops, cell phones, tablets, and other appliances need proper adapters to actually work in Italy. Not only are the power sockets different, but so is the voltage.
