The New Jersey Pumped Storage Facility creates power by transferring water from an upper reservoir to a lower reservoir via a 1.9 mile (approx. 2,000 foot) long Penstock. The 2 billion gallons of water rushing down through this 20 foot diameter pipe each day, generate up to 400 megawatts of power for use during high demand periods during the day.

Mainstream Energy Solutions Limited (MESL) was established in 2011 and licensed as a power-generating company. Through a concession agreement with the Federal Government of Nigeria, MESL acquired the Kainji and Jebba Hydro Plants (HPP) in November 2013, with a combined installed capacity of 1,338.4 MW.

The Federal Government has formally handed over the operations of the \$1.3 billion Zungeru Hydroelectric Power Plant to Penstock Limited.. The announcement was made on Tuesday at the inaugural 2024 session of the National Council on Privatisation (NCP), held at the Presidential Villa in Abuja.

The 456 megawatt plant is likely to begin production in October, making Nepal an energy surplus country. The construction of the long-delayed Upper Tamakoshi Hydropower Project moved a step closer to completion after crews installed a 305-metre-long upper penstock shaft on Sunday, a very challenging and risky task. The lower penstock shaft, which is 367...

A penstock is a pipe that conveys the flow from the forebay to the turbine. The penstock pipe starts downstream of the forebay where the ground profile is much steeper than the headrace alignment. The potential energy of the water at the forebay is converted into kinetic energy at the turbine via the penstock pipe.
