

How much oil does Kazakhstan produce?

It produces more than twice as much crude oil as Azerbaijan but around half the natural gas produced in Turkmenistan. Kazakhstan's total energy production (178 million tonnes of oil equivalent [Mtoe] in 2018) covers more than twice its energy demand. Kazakhstan is also a major energy exporter.

What is energy in Kazakhstan?

Energy in Kazakhstan describes energy and electricity production, consumption and import in Kazakhstan and the politics of Kazakhstan related to energy. Kazakhstan is net energy exporter. Kazakhstan has oil, gas, coal and uranium reserves. Kazakhstan is a leading energy producer in the Commonwealth of Independent States (CIS).

Is Kazakhstan a net energy exporter?

Kazakhstan is net energy exporter. Kazakhstan has oil, gas, coal and uranium reserves. Kazakhstan is a leading energy producer in the Commonwealth of Independent States (CIS). It is a major producer of oil, gas, and coal, as well as being the largest producer and exporter of uranium ore in the world.

What is Kazakhstan's energy mix?

Coal represents around half of Kazakhstan's energy mix (50% in 2018), followed by oil and natural gas (both with 25% shares). Coal is mostly transformed into electricity and heat before reaching the final consumer. Coal fuels around 70% of electricity generation (in 2018), followed by natural gas (20% in 2018).

Who owns the Kazakh oil industry?

The landmark foreign investment in Kazakh oil industry is the TengizChevroil joint venture, owned 50% by ChevronTexaco, 25% by ExxonMobil, 20% by the Government of Kazakhstan, and 5% by Lukarco of Russia. The Karachaganak natural gas and gas condensate field is being developed by BG, Agip, ChevronTexaco, and Lukoil.

Who owns Kazakhstan's oil pipeline system?

Kazakhstan's oil pipeline system is operated by KazTransOil which was formed in 1997 when the two previous oil pipeline companies were combined. It is owned 100% by KazMunaiGaz which is also the owner of KazTransGaz which along with KazRosGaz are the two principle gas transportation companies.

Kazakhstan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The "Hydromash-Orion" specializes in the implementation of strategic projects in promising industries of Kazakhstan and CIS: energy, oil and gas, construction. The Group's activity provides a full range of works -
