

What is M-TEC?

Our mission is the independence of people in the energy supply of their own home through heat pumps, photovoltaics, storage and e-mobility, controlled by our innovative management system. In Upper Austria at M-TEC, 100% renewable energy is used.

How many charging cycles does M-TEC guarantee?

M-Tec guarantees 10,000 charging cycles over a 10-year period. "Together with our 'E-Smart' energy management system, a total energy solution consisting of photovoltaics, battery storage, heat pumps, controllable electric heating elements and charging stations for e-mobility is created," explained M-Tec managing director Peter Huemer.

How does M-TEC storage system work?

According to M-Tec, the storage system can be installed quickly and easily, with the integrated hybrid inverter saving time during assembly and also space in the technical room. The device also relies on network-independent emergency power back-up, which supplies energy even in the event of a power failure.

Tento software, která tvoří jednotu energetického hospodářství M-TEC, sleduje a monitoruje všechny zdroje a spotřebice energie. Nabízí také jednoduchý a přehledný vizualizace spotřeby a výroby energie s denními, měsíčními a ročními ...

With these two energy sources and 4 heat pumps, M-TEC can not only supply the office building and production with energy, but also operate its electric fleet of 12 cars. This results in a ...
