What is a 400 watt solar panel?

A 400 W solar panel does what it sounds like - one panel produces an output of 400 watts of electricity, which yields approximately between 1.2 and 3 kilowatt hours (kWh) daily.

What is a 500 watt solar panel?

The 500 W solar panel was designed to meet the solar energy output needs of medium and large solar systems using fewer panels, which increases efficiency and lowers costs. Solar panels used to be much smaller than 500 W (just 300 W or less as recently as a few years ago), so they represent a big technological improvement.
