Solar panels 101. Solar panels are the most important part of a solar power system since they produce the electricity that eventually finds its way to your laptop, lights and television. In this basic introduction, we look at how this happens. How do solar panels work? Solar panels convert sunlight into electricity through a process called ...

The three main components of a solar power system are: Solar panels (photovoltaic modules): These are the system's heart. Solar panels contain photovoltaic cells that capture sunlight and convert it into direct current (DC) electricity. They are typically mounted on rooftops or in open areas for maximum sunlight exposure.
