

What are Liebert room cooling systems?

Discover our Liebert room cooling systems, ranging from direct expansion and water-cooled solutions, to dry cooling and microchannel condenser units and contacts us about design, integration, installation, and service.

What is Liebert DS data center cooling system?

Liebert DS data center cooling system provides efficient, precise, reliable control of room temperature, humidity and airflow. The flexible Liebert DS offers high energy efficiency, user-friendly Liebert iCOM unit controls, a modular frame, front service access, and multiple compressor and fan options.

What is a Liebert DS?

The flexible Liebert DS offers high energy efficiency, user-friendly Liebert iCOM unit controls, a modular frame, front service access, and multiple compressor and fan options. Liebert DS is offered in downflow models from 35-105kW (10-30 tons) capacities and upflow models in 35-105kW (10-30 tons) capacities.

Why should you choose Liebert?

Safeguarding the technology that drives your business. Liebert helps you create the intelligent ecosystems that meet these needs. Our power and thermal management solutions ensure you can continuously access your vital applications, protect your IT environment, and grow and adapt with changing requirements. Uptime is everything.

What is Liebert DCP & DCD cooling?

The Liebert® DCP +DCD chilled water-based high density cooling family provides energy savings of up to 70% over traditional cooling. The modular approach allows additional cooling to be added as compute capacity grows, without disruption of the data center.

What is Liebert DCP & DCD?

Liebert DCP +DCD mission-critical cooling systems are specifically designed to address the higher heat loads generated by tightly packed electronic rack enclosures. Liebert DCP +DCD is a family of water-cooled systems that offers a cost-efficient cooling alternative.

Liebert DS, DS105A, 105kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

Liebert helps you create the intelligent ecosystems that meet these needs. Our power and thermal management solutions ensure you can continuously access your vital applications, protect ...

Liebert SiteScan allows monitoring and control of virtually any piece of critical support equipment -- whether located in the next room or in a facility on the other side of the country. This web-based data center monitoring system provides centralized oversight of Liebert precision air, power and UPS units, as well as many other analog or digital devices.

1.1 System Description Liebert Deluxe environmental control systems are available in several configurations. Each configu-ration can operate with either Advanced Microprocessor Controls (AM), or Advanced Microprocessor Controls with Graphics (AG). A brief description of each, including operational differences, are listed

Liebert DS, DS053A, 53kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

Liebert® CRV In Row Cooling System, 10-40kW. The Vertiv(TM) Liebert® CRV is a precision data center cooling solution, integrated within a row of data center racks and was designed to address some of the major challenges seen in high ...

The innovative Liebert® CW system lets you rapidly deploy chilled water capacity, achieve higher efficiency and use less white space. It offers the industry's widest range of capacities, featuring the industry's most advanced controls and innovations, such as optimized coil design that maximizes capacity and efficiency even at high entering water temperatures.

humidity and airflow. The flexible Liebert DS offers high energy efficiency, user ...

Liebert DataMate Mission Critical Cooling System, 5-10.5kW. Liebert DataMate is a small footprint cooling system for 7x24 temperature and humidity control in network closets, computer rooms and other small spaces. Its low profile permits floor-mount or wall-mount installation, and requires little or no floor space.

The system's industry-leading Liebert® iCOM(TM) controls capture every available economization hour, with smooth, automated transitions. Advanced protection routines keep the system operating safely within thresholds. Automatic, multi-unit teamwork modes harmonize thermal management across the data center. Optimization routines reduce energy ...

Liebert Deluxe System (VH) Parts Manual While every precaution has been taken to ensure accuracy and completeness in this manual, Vertiv Co. assumes no responsibility, and disclaims all liability for damages resulting from use of this ...

Liebert® LT460 Zone Leak Detection Sensors. The zone leak detection sensor modules install quickly and work simply for reliable warning of potentially hazardous moisture conditions. The supervised zone leak detector uses up to 100 feet of flexible Liebert® moisture sensing cable, offering protection from unwanted leaks.

Vertiv(TM) Liebert® APS Modular UPS, 5kVA - 20kVA N+1, Double Conversion Rack/Tower VRLA 208V UPS Up to 15kVA/13.5kW N+1, 208/120VAC ... Intelligent Battery System provides continuous battery monitoring and protection Offers LIFE(TM) Services, real-time remote diagnostics for proactive maintenance, decreasing the average Mean Time to Repair ...

The Liebert® CW system combines the latest innovations in coil, valve and controls technologies for optimal protection and efficiency. Units in 440kW capacities significantly reduce the cost of deployment and maintenance and improve energy efficiency through an optimized chilled water coil design that can utilize higher entering water temperature (EWT).

Liebert XD Waterless Coolant--This unique application of an off-the-shelf product makes the Liebert XD solution very energy efficient. The XD Coolant operates at low pressure and ...

The Liebert DataMate is a split-system evaporator available in combination with a remote air-, water- or glycol-cooled condensing unit or a close-coupled water/glycol-cooled condensing unit, or as a self-contained, chilled water unit. Models are available to fit small computer rooms, requiring only five square feet or less of floor space, or can ...

The Liebert Mini-Mate2 is a zero-footprint computer room cooling system for 7x24 temperature and humidity control and air filtration. It installs above a dropped ceiling and is easy to service, requiring only front access for maintenance.

The Liebert Mini-Mate2, MMD36E is a zero-footprint computer room cooling system for 7x24 temperature and humidity control and air filtration. null. ... Vertiv(TM) Liebert® Mini-Mate2 System Design Catalog SL-10525 ; Liebert® Mini-Mate2 2 and 3 Ton System Design Catalog SL-10535 ;

Liebert® MC Microchannel Outdoor Condenser, 28 - 220kW. The Liebert® MC Microchannel Condenser is an outdoor air-cooled condenser that provides higher efficiency, while using less refrigerant. Features such as variable speed fans, advanced controls and a microchannel coil make this system uniquely innovative.

Liebert DS, DS077A, 77kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.
