Around the world, lithium-ion battery sales are soaring, with the market value projected to triple from \$36.7 billion USD in 2019 to \$129.3 billion USD in 2027. In data centers and hosting facilities, lithium-ion Battery-Energy Storage Systems (BESS) provide leap-ahead advantages over Valve-Regulated Lead-Acid (VRLA) batteries.

24M, a US company developing novel lithium battery technology based on semi-solid materials, argues that the remaining runway for lithium batteries - the time during which the technology will continue its rollout as the mainstream choice for both EVs and stationary storage - is plentiful. In other words, the dominant technology of today ...
