How many energy companies are in Lithuania?

List of largest 50 Energy Companies in Lithuania. Get accurate data with the number of energy companies in Lithuania by region.

Is Lithuania a net exporter or importer of electricity?

With the closure of its only nuclear power plant (Ignalina's two reactors shut down in 2004 and 2009), Lithuania switched from the position of a net exporter to one of a net importer of electricity. Since then, the shares of electricity imports, natural gas and bioenergy have increased.

Why is Lithuania investing in alternative energy import routes?

This is because ever since the reestablishment of its independence, Lithuania has been investing in alternative energy import routes. These included the development of the Butinge oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipeda LNG terminal and the Gas Interconnection Poland-Lithuania.

We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches. In short, we call ourselves energy movers by nature.
