

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated.

Is Macao a good place to invest in solar energy?

Song and colleagues have no doubts: "Macao has some of the richest solar resources in the world" (with average annual sunlight time exceeding 1000 h, providing about 5000 MJ/m²). "Clearly, Macao has a tremendous potential for developing solar energy, especially a grid-connected photovoltaic system.

Does offshore wind energy make sense in Macao?

"In our view, as external observers, offshore wind energy in Macao's territorial waters makes sense, as does the development of distributed generation of photovoltaic energy. Macao has a lot of sun and many roofs. There is a potential to develop this vector in the medium-to-long term."

What is Macao's long-term decarbonisation strategy?

As the blueprint for Macao's cause of carbon emissions reduction, the Long-term Decarbonisation Strategy of Macao, implemented last year, proposes six key strategies to push forward carbon reduction in all aspects in an orderly manner and lead the public to practice environmental protection.

Other guests attending the 2024 (20th) International Conference on Green Energy-efficient Building & New Technology and Products Expo included: Chuck Chung Yin Albert, President of the China Green Building and Energy Saving (Macao) Association; Kin Hang Lei, Senior Vice President of Human Resources and Sustainability at MGM; Chan Kuong In ...

The Green Showcase in this edition will continue to provide a platform to display innovative green technologies and products. Various green products will be unveiled during ...

The total installed power capacity of southwest China's Yunnan Province had reached 106 million kilowatts

Macao green energy technologies

by the end of 2021, with the installed green energy capacity exceeding 90 million kilowatts accounting for about 90 percent of the total, according to the provincial energy administration. The figure was 2.5 times that of 2012.
