

What type of energy is used in Macao?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Macao: How much of the country's energy comes from nuclear power?

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

How much electricity does Macao need?

As of 2017, Macao has been experiencing an average 2.3% annual growth rate for their electricity demand. Their maximum daily electricity demand is 756.7 MW. As of 2016, total Macao power consumption reached 5,255 GWh. Macao's utility frequency is 50 Hz and at 400 V (three-phase) and 230 V (single-phase).

Will more Macao Residents move to an electric-powered future?

EV advocate Leong believes that with a better charging system and bigger availability of charging spaces, more Macao residents will be motivated to shift to an electric-powered future. But he realises there is much work to be done.

Does Macao need an EV charging system?

For starters, he believes Macao needs to optimise its EV charging systems. The city currently has 200 charging spaces across 42 public car parks and seven streets, according to the Macau Electricity Company (CEM), Macao's sole energy service provider.
