

Maclean energy Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

What does Maclean do?

media@fortescue.com MacLean designs, manufactures, and supports engineered solutions across the mining, municipal, and waste management sectors. The company's mining division builds a comprehensive line of mobile equipment in the ground support, ore flow, and utility vehicle product categories.

Why should we partner with Maclean?

To fulfil our 2030 mission, we must partner with like-minded companies like MacLean, which has a proud reputation for designing and manufacturing innovative and high-quality products for underground mining. Importantly, they also share our vision for a mining industry - and a world - no longer reliant on fossil fuels." -30- For more information:
