

Why does Madagascar have a low rate of electricity?

Only less than 1% of this demand is supplied by other renewable energy sources. This high share of wood energy is explained by its accessibility and its low cost for the population. Madagascar has a low rate electricity access due to its high price and the insufficient quantity production. The national rate of electrification is only 4.7% only.

What will esogip do for Madagascar?

The ESOGIP will aid Madagascar's government to decrease energy loss, increase energy efficiency, raise the ratio of renewables in the domestic energy mix, develop its governance of the energy sector, and improve operational performance of Jirama, Madagascar's state-owned electric utility and water services company.

What percentage of Madagascar's electricity is renewable?

In 2012, renewable energies represent 56.57% of the electricity mix, although Madagascar has a high but underexploited potential. Considering the high potential in hydropower, the retained assumptions are a climb of 15% for the hydropower and 5% for the photovoltaic production, until 2050.

Which energy sources are used in Madagascar?

According to the energy inventory drawn up by the MEM 4 and the study report of the CREAM 5, wood energy has the highest share (92%) in the total energy supply in Madagascar, followed by fossil fuel (7%). Only less than 1% of this demand is supplied by other renewable energy sources.

What is the rate of electrification in Madagascar?

The national rate of electrification is only 4.7% only. In urban zones, such as Antananarivo, this value could reach up. In view of the geographic and climatic conditions in Madagascar, the reality of development of renewable energy technologies (RETs) is complicated despite numerous research works carried out in this area.

What is the national energy policy of Madagascar?

Accordingly, the national energy policy of Madagascar focuses in ensuring electricity supply security by developing hydropower in priority and by improving public-private partnership to establish a national guidelines in renewable energy research.
