

Who manages Lithuania's electricity storage facilities?

At the end of July 2021, the Government of the Republic of Lithuania appointed Energy cells, a company of the EPSO-G Group, as the operator of the instantaneous isolated operation electricity reserve for Lithuania's electricity storage facilities and entrusted it with the management of the electricity storage facilities system.

Why is electricity storage important in Lithuania?

Lithuania's system of electricity storage facilities is essential to ensure the security of Lithuania's energy system and its ability to operate in isolated mode.

How will Lithuania's energy storage system work?

The energy storage system, which will provide Lithuania with an instantaneous isolated operation electricity reserve until synchronisation with the continental European networks (CEN), will be used after synchronisation for the integration of energy produced from renewable sources.

Will Lithuania receive energy storage units in September?

The remaining battery parks will receive the energy storage units in September', said R. Stilius. The energy storage facility system of 312 battery cubes - 78 each in battery parks in Vilnius, Šiauliai and Alytus and Utena regions - will provide Lithuania with an instantaneous energy reserve.

How many MW will energy cells have in Lithuania?

The Energy Cells storage facility system to be integrated into the Lithuanian grid will have a total combined capacity of 200 megawatts (MW) and 200 megawatt-hours (MWh).

How will Lithuania achieve the instantaneous electricity reserve of Isolated mode?

The instantaneous electricity reserve of isolated mode for Lithuania will be ensured by the electricity storage facilities system with the 200 megawatts (MW) and 200 megawatt-hours (MWh) capacity. If needed, the high-capacity reserve storage facilities will start supplying power immediately - within 1 second.

The battery energy storage system will be able to deliver power to the network in less than one second, providing instantaneous power reserve and the ability to operate in isolated mode. The system consists of four battery ...
