

Before connecting a renewable energy source (RES), such as photovoltaic panels, to the national electricity grid, you need to obtain written approval from the Regulator for Electricity and Water Services (REWS). For more information about the required regulatory clearances for new grid-connected renewable energy generators, refer to the ...

Established in 1977, Enemalta is the leading energy services provider in the Maltese Islands, entrusted with the distribution of electricity, and the development of the national electricity distribution network.

As part of the EU's ambitious Green New Deal, Malta has set a target to produce 100% of its electricity from renewable energy sources by 2050, but at current rates, Malta would reach the target ...

Malta's energy system characteristics and geographical isolation are quite unique. Given its limited exports and natural resources, Malta is heavily energy dependent on imported fossil fuels for energy production. Renewable energy remains an opportunity, but also presents challenges because of spatial constraints and scale diseconomies. The usage
