

What is energy in Malta?

Energy in Malta describes energy production, consumption and import in Malta. Malta has no domestic resource of fossil fuels and no gas distribution network, and relies overwhelmingly on imports of fossil fuels and electricity to cover its energy needs.

What is savant power system?

Savant Power System delivers the ultimate solution for smart energy management. Monitor production and usage trends, control circuits at the distribution panel, and manage solar, battery, or generator backup sources all via the award winning Savant App. Our systems scale to meet the needs of any site from single family homes to large installations.

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

How has Malta changed its energy mix?

In recent years, Malta has transformed its energy mix used for electricity generation from one based on heavy fuel oil and gasoil to a more sustainable combination of natural gas, electricity imports via the Malta-Italy subsea connection, and increased use of renewable energy sources.

Why does Malta need solar power?

Increases in energy costs worldwide have given new impetus to this work, since Malta imports nearly all its energy. The government continues to explore additional possibilities for solar power generation and employing other alternative energy sources such as wind power (see also Waste section for related opportunities).

Can US energy suppliers find opportunities in Malta?

U.S. suppliers of renewable solutions may therefore find opportunities in Malta. Further, this gives rise to opportunities for U.S. energy storage technologies and batteries, which assist in flattening the demand curve and smoothing out Malta's energy supply.
