

How will Mauritania increase its energy sources?

Mauritania aims to increase and diversify its energy sources. For example, it has developed an electricity plant that will be alimented by Banda gas . This facility should produce 350 MW in 2015 and will be connected to Nouakchott and Nouadhibou. Furthermore, the plant should produce 700 MW and could export electricity to Senegal and Mali .

Can Mauritania generate low-cost electricity and hydrogen through electrolysis?

Renewable Energy Opportunities for Mauritania finds that the country could deploy these resources at scale to generate low-cost renewable electricity and hydrogen through electrolysis.

How does Mauritania get its electricity?

The last 24% is insured by the electricity importation coming from Manantaly hydro power plant based in Mali. In 2011, electricity production stood at 136 megawatts (MW) in Mauritania and was 100% from thermo power. Mauritania aims to increase and diversify its energy sources.

Why should you invest in Mauritania?

Investing in Mauritania can offer a wide range of opportunities, particularly in the energy sector. With major gas discoveries and large-scale renewable energy projects in development, the country is poised for significant growth in this area.

Does Mauritania use biomass?

In 2003, a study concerning household energy consumption in Mauritania estimated that household energy relies mostly on biomass since it accounts for 87% (59% charcoal and 27,7%) of their overall energy supply. In rural areas, this figure is inverted such as in Guidimakha where 90% of households use wood for domestic cooking.

Why should Mauritania invest in wind & solar energy?

Mauritania has high-quality wind and solar resources whose large-scale development could have catalytic effects in supporting the country to deliver universal electricity access to its citizens and achieve its vision for sustainable economic development.
