In a significant advancement toward sustainable energy solutions, the government of Liberia, through the Liberia Electricity Corporation (LEC) and World Bank Liberia, broke ground for the first utility-scale solar power plant on Friday, October 11, 2024.

The solar farm is part of a broader project for the expansion of the Mt Coffe hydropower plant to 126 MW. The two initiatives are estimated at USD 96 million. In addition, Liberia plans to build a new hydropower plant, St Paul 2 (SP2), upstream of the St Paul River which is expected to produce between 150 MW and 200 MW.

The 40 kWh solar system has been completed by Maxwell's new energy team, and we strictly demand that we never miss every detail and pursue high-quality services. More
