The Indoor Light Series opens new opportunities for developing remote power solutions in low light and indoor applications. These panels are identical to the Classic Application Series but are optimized to harvest artificial indoor light instead of sunlight. They can collect energy at light levels down to 200 lux and below, making them useful for almost any indoor environment.

When comparing PowerFilm solar panels to others referencing them, here are a few things to look out for: Waterproof: If a product claims to be "waterproof" insure you ask the seller for the published IP rating of the product. The IP or Ingress Protection rating tells us how moisture or dustproof something is, for how long, and for how deep ...

PowerFilm has an optimal solution for your application, whether outdoors or indoors. Electronic Component Solar Panels will produce power based on the light available. Below is an example of what you can expect based on the number of Lux a panel is exposed to. [Electronic Component Solar Panel Handling](#)
