

Can Mozambique meet 62% of its energy needs by 2030?

During COP26, Mozambique's prime minister announced the ambitious goal of meeting 62% of the country's energy needs through renewable sources by 2030. However, Mozambique faces a paradox, as it has built its development model on gas extraction and currently relies on coal mining.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

Will Mozambique liquefied natural gas project be restarted?

Japan's Mitsui & Co is collaborating with TotalEnergies and the Mozambique government to finalise plans for restarting construction of the \$20 billion Mozambique liquefied natural gas (LNG) project, CEO Kenichi Hori said on Thursday.

Is biomass a source of electricity in Mozambique?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Mozambique: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Will gas-based generation increase in Mozambique in 2025?

According to BMI Research, gas-based generation is expected to increase by 18.1% annually through 2025. Mozambique's first utility-scale solar power plant, a photovoltaic plant with a capacity of 40MW, was commissioned in Zambezia Province in 2019.

When did independent power projects start in Mozambique?

The first Independent Power Projects (IPPs) in Mozambique came online in 2015. These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing.
